Open Letter to Dr. Steven Greer and Leslie Kean

Dear Steven and Leslie,

My apologies for writing a joint letter, as opposed to separate letters to each of you. After careful meditation, I concluded that by this combined approach I would have a higher chance to highlight the urgent need for collaboration in the so-called 'Post-Truth Era'.

I am a scientist working in the area of climate research. I have previously been in the academic sector for about 15 years, mostly in Australia. Currently, I'm working in the government sector as a senior scientist in New Zealand. About twenty years ago, when I was 22, I was contacted by extremely advanced and benign extraterrestrials. After feeling in my heart what the truth was, doing a lot of research regarding the very first contactees in the early 1950s, and understanding what the right thing to do would be, I decided to accept their request to work alongside them.

My main goal, in my present capacity and line of approach, in as much as I can grasp from the cosmic plan, is to help invoke a higher degree of consciousness. A good part of our UFO visitors are doing everything they can to allow humanity to have the least possible traumatic transition into our next state of evolution. Obviously you know this Steven, and I'm sure you have probably heard of it Leslie, and perhaps you might consider it as a possibility that could be proven or disproven once more data becomes available.

The primary reason I'm publishing this open letter, is to thank you both for your enormous contribution to increase the planetary awareness in regards to the UFO subject. Dr. Greer, your movie "Unacknowledged" was a 'delight' to watch. I say 'delight' between quotes of course. The handling of the topic by those in power is saddening beyond belief. Just like you, I have also cried watching the movie. To think about the type of civilization we could actually have had on Earth by now, if it wasn't for the selfishness of those who profit from human exploitation! I really hope you'll be able to promote this movie to reach a more mainstream audience. People from all walks of life need to have this perspective, and be empowered by this information, and the possibilities that lie ahead for the entire human race.

I was really emotional when you played Louis Armstrong's '*What a Wonderful World*' at the beginning. I assume you could not possibly know that Louis is

currently working from the higher planes on a project to help colonize the moon, when time is right. I was given this information years ago in meditation, while reading the Akashic records regarding what happened during the Apollo 11 mission. Steven, your book of the same name is also a fantastic and fundamental resource to empower people. You have my greatest thanks for this work. I'm sure I can also speak here on behalf of our friendly ETs, and all those witnesses who have been oppressed by the ridicule policy for so many decades.

Leslie, I read your book 'UFOs: Generals, pilots and government officials go on the record' immediately after I read Steven's book, and it was a perfect complement. Each book contributes from a very different angle, and when you put the pieces together you can start draw a more cohesive pattern. I've also read your book in the wake of having read all of Major Donald Keyhoe's main books. I remember thinking, "when are we going to have quality work ever again produced in this area". Well, you've given us the answer Leslie.

Actually, in a way I think your work is even more important, as it has been written in a way that can potentially reach out for those who are still highly skeptical that there is any reality regarding the UFOs. In particular, I have great hopes that your work will be pivotal in order to promote change and greater awareness within the scientific community. Hopefully this is not too far away!

Leslie, I was also delighted to see that you have taken a firm interest in the research of life after death. I, and many others working on spiritual lines, have long held the view that this is absolutely essential for the UFO topic. Why? The UFO phenomenon manifests primarily in a parallel dimension that can be tapped into by consciousness. Therefore, in order to be able to correctly study it and understand it scientifically, it is absolutely vital that our scientific awareness can evolve to the point in which it will recognize the survival of consciousness, independently of the gross physical body.

By proving life after death as an indisputable fact, humanity can then be much better equipped to start researching into the realms of consciousness, telepathy, out of body experiences, other dimensions, karmic law and reincarnation, and so forth. These are all fundamental pieces of the UFO puzzle. This type of research will eventually equip us to start understanding where the UFO approach towards us is coming from, and how telepathic contact can be and has been established for many decades.

Leslie, if you are keen to continue on this more metaphysical line of research, I suggest that you might wish to have a look into the so-called early 'contactees' in the 1950s. I think you'll be surprised by what you'll find. I'm not sure if you and Steven have heard of one contactee in particular, George King (1919-1997), who was called *primary mental channel* by the ETs themselves. This was because of the fact that this person was a master of yoga, and could raise his kundalini to the crown while in a trance state. This allowed him to receive ET transmissions, through his own vocal cords, with outstanding precision. There is extensive material available out there that has never been properly researched. Of course, the ridicule policy would not allow it!

Steven, speaking of a more metaphysical approach, I was really pleased to read your recent announcement that you're now interested in the concept of cosmic consciousness, advanced mantras and so forth, as to promote/initiate ET contact. Your protocols for contact are very interesting. I think this principle has a great potential to be a game changer, empowering the 'believers' into action. This can change the attitude from a more passive one towards a more active approach in regards to ET contact.

As far as I understand, the ETs will not come down openly until we initiate peaceful contact and welcome them to land without any hostility. Your approach can help a lot in this regards. I was also pleased that you're now embracing metaphysics, which simply stated is just the study of 'states of energy and consciousness' At least that's how I would define it. I remember having read some not very kind words about metaphysics in your book, but your latest moves prove that you're now onto it (even if perhaps you might call it something else). It's like the stigma carried by the 'UFO' jargon, as extensively pointed out by Leslie. Language is limiting in the best of times, and names often times carry a lot of stigma in our society.

Leslie, I also wanted to briefly mention that I have recently contacted Nick Pope via e-mail, to congratulate him on his efforts on the same front. I've also given him information on the Rendlesham forest UFO case, which he studied in detail. I have received this information from one of my trusted collaborators in Switzerland, who received a telepathic answer to a question I asked to an ET intelligence who is an advanced cosmic adept. The information was given in such a way that surprised me, and we felt it was important and desirable for it to be made public now, especially because it potentially deals with the future of our own civilization. You can find this contribution on my website (provided below), under 'Visitors from the Future', if you're interested.

Steven and Leslie, please feel free to contact me through my website below, should you require further details about my professional activities and credentials as a scientist (some personal information is available in there). Equally, please contact me if you have any ideas for collaboration, or if you would like more details about my ET experiences, and my overall approach. Naturally, the ridicule policy is still in place, and one needs to tread carefully amongst a hostile background of disbelief and ridicule, or even ET phobia. You have experienced this yourself as a profound, almost unconscious internalized process Leslie, as you have so bravely shared in your book. You can imagine how much harder the toll for an actual contactee within the scientific community. Unfortunately, I feel that most of my professional colleagues are not prepared to even discuss the topic. There is an urgent need for this to change, if we are to move forward.

To close, Steven and Leslie, I'm a strong believer that the way forward to get out of this miserable chaos in which we dug ourselves into is through diligent research, truth, and a combined collaborative approach from several different backgrounds and experiences. I don't expect you, of course, to believe in

everything I said in this letter. But the material is out there for analysis. I think we can all agree that we live in exceptional times that require new tools of consciousness. We also have an exceptional problem on our hands, and potentially an immensely bright future ahead, if we put egos aside and join forces for the truth to come out.

Sincerely,

Alex Light
